More Advice Parents Should Give Their Children!

1. The world is NOT fair; learn it now or learn it later (later is much harder!)

2. The real world will not cut your children slack so it is important to teach them how to take responsibility for their own actions early!

3. The world will expect responsible, respectful behavior, not whining.

4. Reality will teach your children the lessons you do not, and not as kindly as you would!

5. The world does not care about self esteem; they want the job done right without excuses or blaming others.

6. The world expects you to accomplish something first, then feel good about what you’re done. It will not praise everything you do.

7. Mistakes are lessons; the sooner you learn from a mistake the quicker you can move on.

8. Trying is more important than succeeding.

10. Privileges are earned.....not an inborn right!
